Subject: Deadline Extension for Volumetric Annual Reporting of Wastewater and Recycled Water
Attachments: 4.29.20 Recycled Water Volumetric Reporting Extension Letter.pdf; 2019-0037_VolumetricReporting.pdf

This email is being sent BCC to the NPDES roundtable, the WDR roundtable, and Recycled water roundtable.
Hello all,

The recycled water unit wanted to provide notice that we are sending a letter to applicable recycled water and wastewater permittees to extend the deadline for volumetric annual reporting from April 30 to June 30 due to COVID-19. This extension will be sent out through LYRIS, via email to the permittees that we have email addresses for, and will also be sent by CASA and WateReuse CA to their members. Any permittees that we do not have contacts for will be sent a hardcopy mailer.

Below is the LYRIS notice that will go out this afternoon, along with the 2019-0037 Order and the signed extension letter(attached).

Deadline Extension for Volumetric Annual Reporting of Wastewater and Recycled Water

On April 29, 2020, The State Water Board Executive Director granted recycled water and wastewater permittees a 60-day extension on the deadline to report volumetric data from April 30 to June 30, 2020. Order No. WQ 2019-0037-EXEC (As Amended on January 14, 2020) requires applicable permittees to annually report volumetric wastewater and recycled water data by April 30 of each calendar year. This extension provides agencies flexibility during the COVID-19 pandemic and will assist agencies in completing their volumetric annual reports.

Volumetric reporting requirements **only apply** to permittees listed in Attachment II of the Order (attached). If a permittee is not listed in this Order, no action is required.

As soon as possible, applicable permittees should create a Responsible Party GeoTracker Electronic Submittal of Information (ESI) account using guidance on the Water Quality Control Policy for Recycled Water (Recycled Water Policy) [Volumetric Reporting webpage](#). This initial step will facilitate further communication regarding these reporting requirements. The webpage also contains resources for completing the report, including a training webinar, help guide, and frequently asked questions fact sheet.

Applicable permittees must submit the 2019 volumetric annual report through GeoTracker ESI no later than June 30, 2020.

If you have any questions or would like additional information, please visit the [Recycled Water Policy webpage](#) or contact the State Water Board at: recycledwater@waterboards.ca.gov

If you have any questions please contact Rebecca Greenwood or Laura McLellan.

Thanks,
Rebecca Greenwood
